Mesa Mesa Reservoir Terms and Conditions Report - Southwest Colorado Blue Mesa Reservoir from 9.10.2021, the reservoir continues to produce kokes and lake trout in a variety of marks. Blue Mesa Reservoir James M. Hayden Meadows remains the most part of Arkansas, although now that the Voluntary Flow Management Program has ended beyond the river below the confluence of Lake Creek, it will offer easier access for wading. This adjustment has returned the river to the ideal flow range for our local trout (240-400 CFS in Wellsville width) and you will be able to maximize your use of the river to your benefit. Crankbaits, pull baits or swimbaits caught with a slow-to-medium-recovery erratic can be hit. Surface feeding has become more consistent with the current activity of invertebrates. Boaters are having just successful trolling with trackers and spoons for trout. Some reports of some bass caught early in the morning and evenings. The peak season ends at the beginning of September. Pike and Walleye will also chase streamers and poppers, but they will usually require some kind of leader to keep them from getting free. St. Vrain State Park Barr Lake From 27.08.2021 park staff report good windshield wiper action. Early morning and late PM is the best time to fish. For more information please call (303) 690-1166. Cherry Creek Reservoir Standley Lake Please call ahead before heading to the reservoir to get up-to-date lake and inshore fishing conditions. The input is 31 CFS, the output is 275 CFS. The closure began on May 25 and will continue until further notice. Yampa River Blue River As of 9.10.2021, anglers have reported success with caddis imitations and the flows are allowing dry flies. Opportunities are increasing for a trophy fish. The boat ramp will be closed on September 12 or earlier due to low water level. Anglers have reported good size catfish, perch, and trout closer to the entrance. Bass fishing is good and catfishing is right to good. Arvada Reservoir Bear Creek As of 9.10.2021, anglers have reported successful catch of walleye with a variety of lures. Small imitations of minnows on a skeleton head inclined with a small piece of sucker has been go-label, chartreuse or orange orange There are no new fishing reports and those received declared fishing very slow and hard. A Green Mountain Reservoir Lake John As of 9.10.2021, reports indicate that large trout continue to be landed regularly in the lake. Lake John Grand Lake From 9.10.2021, Fishing with Bernie Guide Dan Shannon reports, "Ramping hours are 6 a.m. - 6 p.m. Water temperatures continue to cool down and less traffic in the water has helped the bite. Perch and walleye are plentiful. Some trout are being caught out of the prey using PowerBait throwing 40-50 yards using a sliding platform. This area is seeing a lot of pressure, so be very polite to the anglers and try to give your neighbors a lot of their own space to fish. For current conditions, please contact the park staff at 303-659-6005. Barr Lake Cheesman Canyon As of 9.10.2021, Cheesman Canyon continues to fish very well. The times of bite have been extended throughout the day with parades of mid-morning and late afternoon. The bite of the lake trout is slow for just the first half of the day. Rainbow trout and brown trout bites have been good, fish along the coasts and docks with erratic recovery of spoon or crankbait, the color does not matter, but be sure to pay attention on the pause of the lily. Kastmasters, Tas Devils and Krocodiles are also hot. After a low spring and disappointing runoff, the fish are healthy and have performed well through the high water." Flows: 278 CSA at Hecla Junction (9.9.2021) RAO Arkansas - Good View to the Reservoir of Salida John Martin From 10.9.2021, the RAMPA WEST BOAT is closed due to low water levels. Please ensure responsible release and of the fish and properly discard the fishing line. Remember, the daily limit for the trout is four fish per person. "A, James M. Only the release of hand vessels is allowed. The terrestrials like the hoppers, the ants and the beetles will also be outside" . Flows: 36.6 in Dolores (9/9/2021) (9/9/2021) RAO Gunnison RAO As of 10.09.2021 Duranglers reports: A "If you want to fish more fish, put on the nymph platform and fish deeply with weight. Pop Gear goes very well with Arnies Pop Gear or Green Rainbow by Lure Jensen. Fishermen have also reported success in catching bass and perch. Lago Pueblo Hugo SWA Ponds As of 9.10.2021, there are no new species reports for this body of water. A A Hugo SWA Ponds Kissel Pond As of 9.10.2021, fishermen have reported good cat fishing in the last parts of the dAA. A Kissel Pond Blue Lake As of

9.10.2021, fishermen have reported success catching catfish, walleye, and carp. Blue Lake Reservoir From 9.10.2021, early fishing by sea and at night can be beneficial both for fishermen and fish. Rosemont Conditions Report á Northwest Colorado Vega Reservoir From 9.10.2021, all boat ramps are closed for the season. Don't overthink it: dried/dried on your favorite 4 weight and dried! Hoppers and caddis should be out! Flows: 78.7 CFS near Placerville (9.9.2021) Duranglers.com Ro San Miguel Ro Uncompahgre From 9.10.2021, Duranglers reports, Nymphing smaller insects is not a bad idea, but try a leech or worm SJ too. Flows: 130 CFS below plaster (9.9.2021)  Eagle River Green Mountain Reservoir Starting from 30.7.2021, reports indicate that reservoir levels remain low, especially in this time of year. Seaside fishermen doing well at sunset and at night. Great time of day to be in the water, the moose is talking along the bank of RMNP and fishing is improving from day to day! Granby Williams Reservoir holder Starting from 9.10.2021, Fishing with Bernie Gua, Randy H reports, The new ramp hours are 7 AM to 7 PM. P  in with the park for the last ice conditions at 970-522-3657.North Sterling Reservoir St. Vrain State Park As of 9.10.2021, pike and walleye/sausage will also chase larger swimbaits and spoons, but we recommend suspending only a one foot down, as most ponds with Pike are very shallow at St. Vrain. The West End gets a lot of attention but we are catching fish all over the lake. South shore has produced good-sized trout very regularly using PowerBait and doughballs. No other reports on any other species at this time. Be careful on your approach to the water to not scare away any potential targets. The story of this past Summer? Fish will be looking for oxygen, so if you can find aerated water you'll find trout. Midday will be the busiest on the river. Walleye action is slow with a few reports of some fish being caught trolling with bottom bouncers and crawlers. Dry dropper and shallow nymphing tactics are generally the most productive, but streamer fishing has been very effective lately, as well. Rainbow trout and Brown trout are active and moving shallower, target these fish by trolling spoons and cranks in 12' of water along shorelines or casting crankbaits and tubes along rocks and transition areas. It all depends on the water in front of you. Anglers have also reported success nymphing while others have tried dry droppers. Anglers spotted our first late-season hatches of blue-winged olives last week below Buena Vista, so small baetis nymphs, emergers and dry flies should be in your arsenal. We have a little extra water in the river this morning which makes for a slightly easier float fishing environment dow near Salida, and the river has been fishing incredibly well so far this week. BWO hatches are starting, and afternoon dry fly fishing can be great. We sell some awesome traps that will fill up and make you happy with a big haul of deliciousness. At times fish are incredibly surface-oriented, yielding windows of great dry and double-dry fly fishing. Northern Pike are slow but catchable if you're very persistent. The bite can be hit and miss but there sure are a lot of very nice fish being caught in the 18" to 24" class. Streamers can also A great way to probate some of the most deep pockets north of Buen Vista. Flows: 85 CFS in Hayden Meadows, 119 CFS in Granite (9.9.2021) Arkansas River  Leadville to Buena Vista Lake Trinidad As of 9.10.2021, the park staff reports that the lake is in 838 superficial acres with an elevation of 6193.01, and the water level is decreasing. The trout will be more deep. Fishing has been fair for all species. There is no good news to report, except one here and another there. Parking hours for September 6:00 A.m.   8:00 p.m. To get more information call 303-326-8424. , Quincy Embedded Conditions Report   Dusto de Colorado Eleven Miles Reservoir From 9.10.2021, 11 Mile Marina reports Trout fishing is Just a good one. DIY guides and fishermen are reporting very good dry fishing and dried dropper this week, but nymph through the further pools and pockets will also be effective. The little caddis are also hatching through the morning and nights. A variety of baits are working on how you like to fish. Some water discoloration means using some bigger insects. Flows: 601 cfs below the Gunnison tunnel (9.9.2021) Duranglers.comGunnison River Ro San Miguel As of 9.10.2021, Duranglers reports:  The Flows are quite solid at this time for this high campi   a river. All other species do not report or do not report. Also the anchor in 30-45' of water and the fall of the trackers and feed bait has been working well for some navigators. Try the dike with templates and soft plastic. Surface temperature is 63 Early morning heating in the mid-60s. , Boyd Lake North Sterling reservoir As of 9.10.2021, park staff reports that Walleye fishing and type of fish is fair, drum and They are well and the fishing of catfish is currently good. This cooling, together with the recent fall of the flow rates, will provide a very comfortable environment for our resident trout that is directed towards the autumm. Less presumed higher fish. The Reilly Highway remains closed to vehicles, however, access is allowed. Most of the vehicles will have to be partially submerged to launch ships from trailers., John Martin Embalse Lake Pueblo as of 9.10.2021, the Walleye fisheries has increased and the fishermen are reporting successful in A variety of signs. For more information, call 303-326-8425. Rainbow coastal fishing is slow due to low population, but as water continues to cool, large resident rainbows will feed along the coast. Bluegill and Sunfish will be more productive. Tubes or small larvae with mammoth tip worked slowly at the bottom is functioning better. With the flows falling to native levels, the fish is expected to occupy more from the river instead of only the edges as they do during the high summers. It will not hurt you try a streamer either. Superior of Dolores is solid to fish. In some areas it is difficult fishing due to aquatic vegetation. The capacity of water is 75%. The clarity is excellent in the central basin and the flow rates have declined now that we have returned to a sunny and dry climate. The tube templates are arriving. Covers trout in the process. Stop and we'll show you how we do it. Water temperature is 74 degrees. We are still working the blades and skiers with a variety of offers. In the most hot days, the action is expected to be better for the morning and at night, with a possible calm Thirty afternoon during the heat of the day. We have had action throughout the lake. Those species of warm water include black trailer, type of black fish, blue guts, and catalog catfish. That said, the guides saw our first blue blue winged autumn hatches last week, so we can see more fish eating tiny beetis patterns in the next  weeks. A  of good fish in the range of 28" to 33" that is caught. We will still have enough water to float fish in Arkansas, but this adjustment is definitely good news for wade fishermen who will have more flexibility in drinking water the rest of the summer. The bigger fish are showing their face and even taking blows now. The fish are up and move around in the sea, but by the measure most of them are belly down in the bottom. The  site is OPEN to navigation  n. Robb Ro Colorado Ro San Juan As of 9/10/2021 Duranglers report, "Loneliness in the river in Pagosa village is limited to the first and last hour of the day. The next few  weeks should provide some excellent opportunities in late summer. It's the best time of the season if you like shrimp. The lake is 5 meters away. Kokanee trolling is very slow as CPW has not visited the lake since 2019 in an effort to rid the Kokes of gills lice" Fork Reservoir Mack Mesa Reservoir Mack Mesa Reservoir is refilled and repopulated with bluegill to begin developing a fodder base for largemouth bass and other species to be stored later this summer. The low and clear flows in Hayden Meadows can make fishing more technical and crepey fish, so be very thoughtful in your approach. For more information please contact the park staff at 303-791-7275.  Chatfield Reservoir Cherry Creek From 9/10/2021, park staff report fishermen who have increased the success of catching walleye, crappie, trout and bluegill. Currently, trout fishing is fair.
